

HEMANTH RAJ G

hemanthad013@gmail.com | +91-9791134881 | linkedin.com/in/hemanth-raj | Hemanth-2004-Git

OBJECTIVE

Aspiring Software Developer and AI Engineer skilled in Python, full-stack development, and machine learning. Passionate about building scalable, real-world applications and actively seeking development opportunities to contribute to innovative teams.

EDUCATION

B.Tech – Artificial Intelligence and Data Science, Prince Dr. K. Vasudevan College of Eng and Tech: CGPA: 8.3
2022–2026

HSC – Gurunanak MHSS: 86.5% 2021–2022

SSLC – Gurunanak MHSS: 69% 2019–2020

EXPERIENCE

Software Intern – Litvik Software Labs, Chennai: Jan 2025 – Apr 2025

Worked on a React.js-based Admin Dashboard and Concrete Rate Calculator. Contributed to UI development, state handling, and responsive layout design for operational tools.

ML & IoT Intern – MRL: Aug 2024 – Sep 2024

Designed and deployed ML models for anomaly detection in real-time IoT data. Worked on cloud-to-edge integration and sensor data pipelines.

NSS Coordinator: Led and organized community outreach programs and university events, building leadership and collaboration skills.

PROJECTS

AI-Based Image Forgery Detection (RIFD-Net): Built a system using **VGG16, HOG, and SIFT** to detect forged images (copy-move, splicing). Achieved 95%+ accuracy and integrated **SHA-256 blockchain hashing** for secure validation. GUI built using MATLAB and Python.

Smart Mining Rover (IoT): Designed a mobile rover with environmental sensors for mining safety. Enabled real-time monitoring and alerting using IoT modules for disaster prevention.

Real-Time Messenger App: Built a full-featured messaging platform using **Next.js, React, Firebase, and Node.js**. Features include one-to-one chat, group chat, real-time sync, and **VoIP calling** using WebRTC.
Live Demo: `hide-in.vercel.app`

Deal Spot – Smart Product Price Tracker: Developed a deals aggregator that scrapes discounted products from **Amazon, Flipkart, Meesho, and Myntra**. Includes wishlist, live price tracking, and redirects to original stores. Built using **React.js, Node.js, Firebase**.
Live Demo: `deal-spot.vercel.app`

TECHNICAL SKILLS

- **Languages:** Python, Java, SQL
- **Frameworks/Tools:** React.js, Node.js, Flask, Firebase
- **AI/ML:** Machine Learning, Deep Learning, Power BI
- **Cloud/DevOps:** GCP, Git
- **Other:** REST APIs, Agile, UI/UX Concepts

CERTIFICATIONS & ACHIEVEMENTS

- First Prize – Scout Rover Project — LEAP – IITM Incubation Cell
- Cloud Digital Leader – Udemy
- Python for Data Science – Great Learning
- Full Stack Web Development – Udemy
- Coordinator – 12th Int'l Engineering Conference, 2024
- Best NSS Volunteer – Prince Dr. K. Vasudevan College of Engineering and Technology
